

Science Seminar Series *presents:*

# OUR RIVERS ON DRUGS

by Dr. Emma Rosi-Marshall

On **Thursday, April 21**, Cary Institute scientist Emma Rosi-Marshall, Ph.D. will discuss the effect that pharmaceutical and personal care product pollution has on rivers and streams.

This pollution includes an array of contaminants, from prescription medications and over-the-counter drugs to antimicrobials and cosmetics. These compounds enter our streams and rivers from our households, and are often not removed by wastewater treatment facilities.

Learn how pharmaceutical and personal care product pollution harms aquatic life and compromises the health of our nation's freshwater systems. Dr. Rosi-Marshall will also outline what is needed to combat the growing problem.

The event will be held at Stroud Water Research Center, located at 970 Spencer Road in Avondale, PA 19311.

For more information, call 610-268-2153 x288 or email [jprovinski@stroudcenter.org](mailto:jprovinski@stroudcenter.org). Doors open at 6:30 pm.

## Thursday, April 21, 2016

Doors open at 6:30 pm for light refreshments.

Lecture begins at 7 pm and, following Q&As, it concludes by 8 pm.

**Event is FREE to the public.**

RSVPs are not required, but appreciated: [www.stroudcenter.org/events](http://www.stroudcenter.org/events)
