

Chester County's Schools, Children, and Income

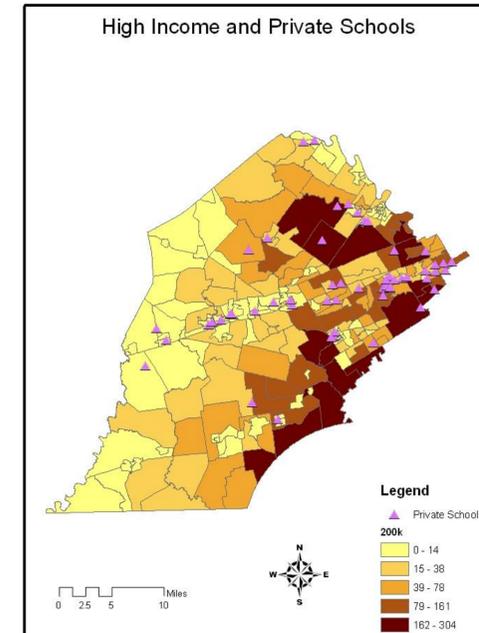

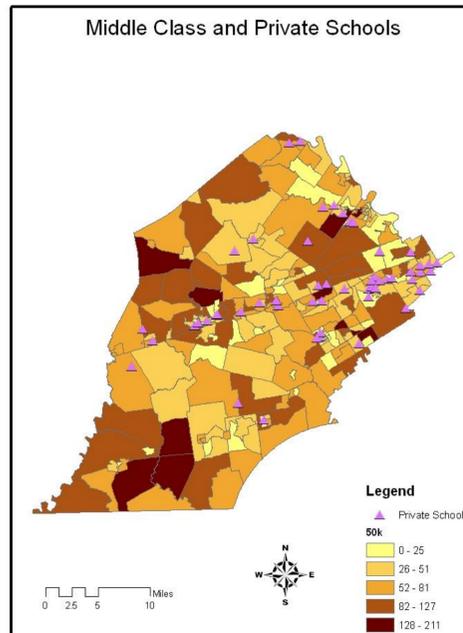

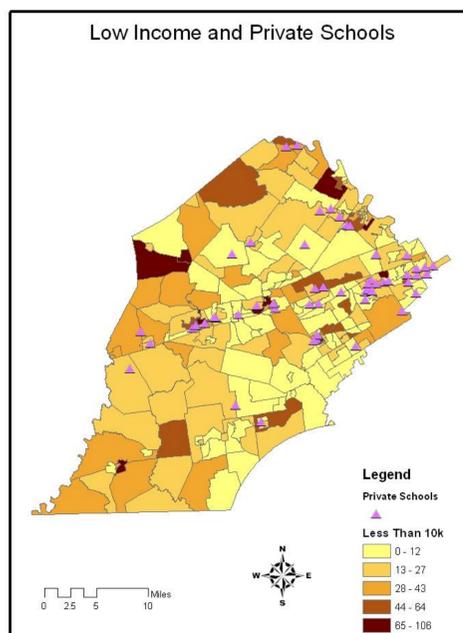

The public and private school locations do not seem to be affected by the location of the Less than 10k income bracket.

The public schools appear to be strongly correlated with the 50k income bracket while the private schools are some what.

The private schools are strongly correlated with 200k bracket while the public schools are some what.

Population	
Total	316,050
Children 5-19	95,385
Less than 10k	6,634
50k	13,719
200k	9,539

Population Percentage	
Less than 10k	2%
50k	4%
200k	3%

Objective: To show the lowest, middle, and highest income level residents in Chester County and how they relate to children in private and public schools.

It appears that schools have been appropriately placed where a high concentration of students ages 5-19 tend to dwell.
