

how to use the new readers

ONCE THE NEW READERS ARE INSTALLED,
YOU WILL HOLD YOUR RAM CARD ID BADGE
IN FRONT OF THE READER FOR ACCESS

Hold your card in front of the reader, the LED will turn **green** (access granted) and you will hear a beep.

A **red** LED indicates that the door is locked. When you hold your Ram Card in front of the reader, it will flash **red/green** at a faster pace while unlocked.

A very slow flashing **red/green** means the door is unlocked through a programmed schedule.

An **amber** LED indicates that the door is alarming or in maintenance mode.

DO NOT PROP DOORS OPEN.
