

## SLO SCORING TEMPLATE

Student Name (use a pseudonym)	Baseline (Pre-assessment score)	Growth or Achievement Goal	Final Score (Post Assessment)	Exceeds/Meets Goal (yes/no)
Student A	36	46	30	No
Student B	45	50	55	Yes
Student C	26	42	80	Yes

Calculate the percentage of students that met or exceed the above-identified goal  $2/3 = 67\%$   
Based on the data collected and criteria below, students did not meet my performance expectation (less than 80 percent of my students did not reach their goal).

**Does Not Meet** --- 0 - 69% of students performed worse than expected

**Needs Improvement** --- 70% - 79% of students performed as expected but overall the group is below expectation (need a minimum of 80 percent)

**Meets** ---- 80% - 94% of students performed as expected

**Exceeds** ---- over 95% of student performed better than expected
