

CONNECTING TO RAMCAST FOR PROJECTION

1. Tap the Crestron touch panel at the podium to activate the system.
2. The default is set to Ramcast for wireless projection.
3. The IP web address and session key are displayed on the front display.

FROM YOUR DEVICE:

4. Launch the Solstice app.
5. Enter your username when prompted.
6. *Connect to a Display* screen appears > Choose desired room > Enter the session key from the display.
7. Select what you would like to share.

STOP SHARING FROM THE PODIUM & THE APP:

- Select **Disconnect** in the upper right-hand corner of the Solstice app window.
- From an iPad: choose **Disconnect** AND swipe down from the right-hand corner, select **Ramcast**, and **turn off mirroring**.
- Shut down the room system by tapping **System Off** on the Crestron panel.

**** It is recommended to use HDMI if presenting video. ****

Before using Ramcast to project wirelessly, you must download the Solstice Client App to your device.
