

Department of Health  
Environmental Health Minor

Student Learning Outcomes

Student Learning Outcome #1	Students will demonstrate fundamental knowledge about how the environment can be polluted and the problems pollution creates and how these problems can be solved.
Student Learning Outcome #2	Students will demonstrate their information literacy by accessing, processing, comprehending, and evaluating scientific information about environmental disease agents from a variety of sources.
Student Learning Outcome #3	Students will demonstrate their understanding of environmental regulation so they can assist an organization or community in its participation in the environmental regulatory process.
