Our staff consists of engineers, scientists, and analysts empowered by a deep understanding of science, rooted in theory, and tried in practice. Learn more at www.jrad.us.

Job Description:

JRAD is looking for a statistician to support clients in the Edgewood Maryland area. The selected candidate would be expected to supply technical support in test and experimentation planning, data analysis, interpretation of results, and reporting.

Requirements/Qualifications:

The candidate should have strong quantitative, analytical, critical thinking, and problem solving skills. A master's degree (or higher) in statistics, biostatistics, or related field with experience in the following areas is desired:

- Design of Experiments
- Data assimilation and compilation
- Hypothesis testing
- Small sample statistics and analyses
- Categorical data analysis
- Graphical and tabular displays
- Report generation
- Minitab, R, or other statistical software

The candidate should be a self directed and self motivated individual possessing interpersonal and team member abilities. Excellent verbal and written communication skills with the ability to present and explain any techniques used are a must. In addition, the candidate should be able to define and capture business needs as well as to articulate strategic implications of the analytic results.

Current U.S. citizenship is required.
